PTC Cladding

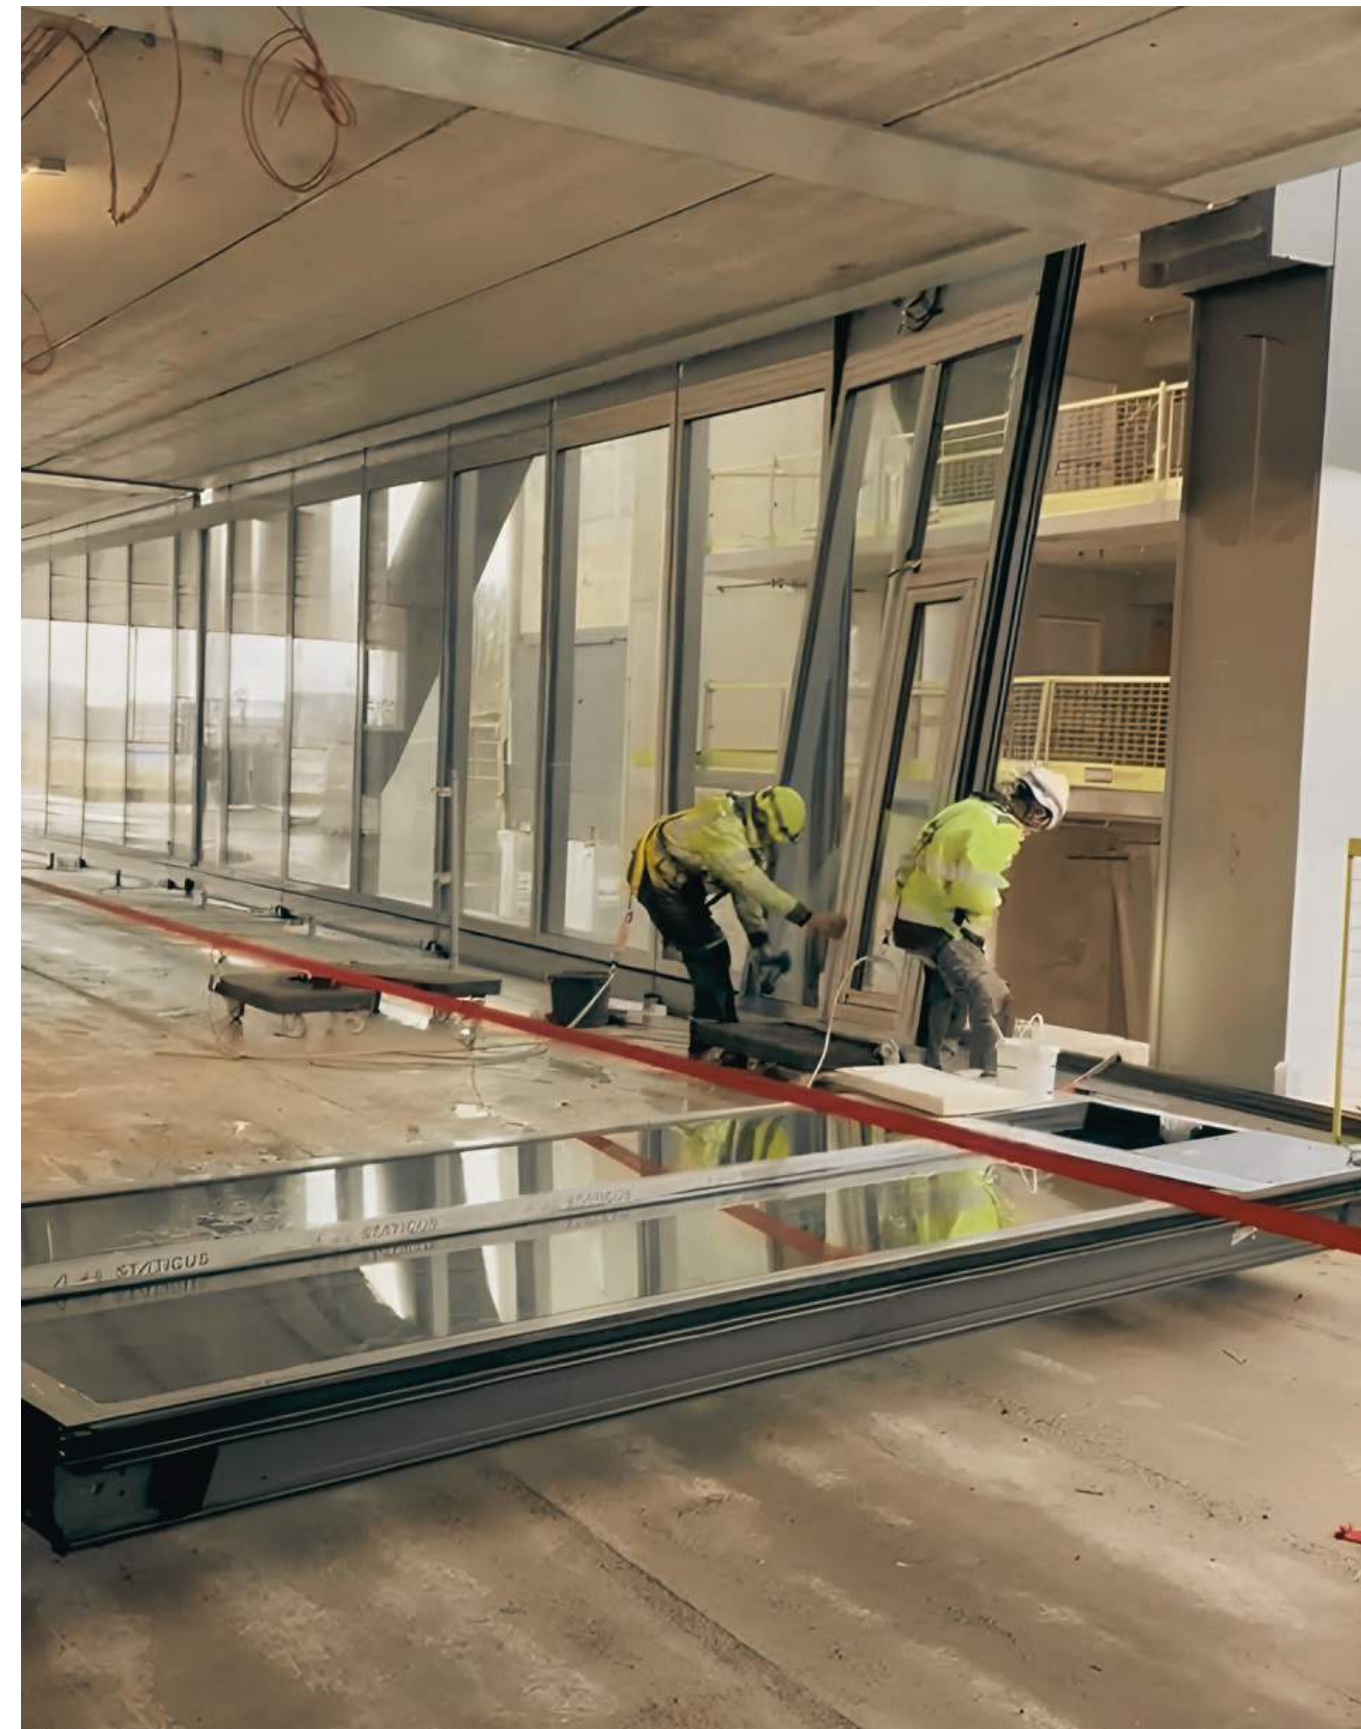

Company profile

|

Established in 2015, PTC Cladding has become a trusted partner in the European cladding industry, specializing in the installation of high-volume and technically complex facades and prefabricated structures. We work closely with our customers to deliver projects that demand precision, expertise, and a commitment to quality.

About Us

What We Do?

Cladding features

Installation of rainscreen claddings in a wide range of materials—including GRC, aluminium & timber. Our services also cover balustrades, decking, and other architectural features.

Glazed elements

Installation of standartized and bespoke glazed structures – windows, doors, curtain walls, skylights and more. We work with aluminium and timber frame systems.

Prefabricated structures

Large scale facade delivery using prefabricated unitized aluminium framed panels. Assembly of off site manufactured timber and precast structural or facade panels.

KEY

P r o j e c t s
